Dr. Abolfazl Mirani ^{a*}

^a Chief Editor Medico & Engineering Future Journal (MEFJ)

We are delighted to present the Summer 2025 issue of *Medico & Engineering Future Journal (MEFJ)*, marking Volume 2, Issue 1 of our publication. This milestone represents a significant step in the journal's development as we transition from an annual to a quarterly publication schedule. This change reflects our commitment to providing timely and cutting-edge scientific content in the rapidly evolving fields of biomedical engineering and medical technology.

In line with this transition, we have applied for an International Standard Serial Number (ISSN) to formally register MEFJ as a recognized periodical publication. Additionally, we are preparing to implement Digital Object Identifiers (DOI) for all published articles, ensuring persistent, reliable access and enhanced citation capabilities.

We are also excited to announce the addition of a new editorial section: **Letters to the Editor**. This fourth section complements our existing three primary categories — **Original Research Articles, Review Articles, and Case Reports** — by providing a dedicated platform for readers and researchers to engage in scholarly discourse, critique published work, and foster dynamic scientific exchange.

MEFJ is committed to advancing interdisciplinary research at the intersection of medicine and engineering, featuring high-quality peer-reviewed articles that cover innovative technologies, clinical applications, and theoretical advancements. Our journal aims to serve as a vital resource for researchers, clinicians, and professionals seeking to stay abreast of the latest developments and contribute to the future of medical science and technology.

We thank our growing community of authors, reviewers, and readers for their continued support and collaboration. Together, we look forward to advancing knowledge and innovation through MEFJ.

Sincerely,
Dr. Abolfazl Mirani

Chief Editor
